

What's hiding in the UCSF Industry Documents Library about Breast Cancer?

Join us for a workshop to highlight how industries including tobacco, oil and gas, pesticides, food, and pharma manipulated science and public opinion to cast doubt on links between their products and breast cancer.

The workshop will cover:

- Key findings from a 1-year research project uncovering what industry knew about breast cancer risk and their products
- New methodologies for research / advocacy / journalism collaborations to put the documents to work for you
- California Breast Cancer Funding opportunities
- Building a network of breast cancer advocates and scientific partners

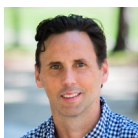

Speakers:

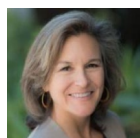

Jayla Burton,
MPH, MS
Breast Cancer Action

Cristin Kearns,
DDS, MBA
Lead investigator, IDL
Breast Cancer Project

Nick Chartres, PhD
UCSF Program on
Reproductive Health
and the Environment

Tracey Woodruff,
PhD, MPH
UCSF Program on
Reproductive Health
and the Environment

Sharima
Rasanayagam, PhD
California Breast Cancer
Research Program

August 23, 2023
11:30 am to 1:30 pm PST
Online workshop
